SUMMIT MAIN
STAGE**

11:00 AI and sustainability: the path to a smarter and greener future

Artificial intelligence (AI) offers enormous potential to drive sustainable solutions. This panel explores how AI is being used to tackle environmental challenges and promote sustainable innovation. Experts from the tech industry, sustainability research and environmental organizations will discuss concrete applications, risks and ethical issues. Can smart technologies really contribute to a more sustainable world, and what role do data-driven decisions play in this?

STAGE**

15:15 Green Leadership: How sustainability departments attract the best Gen-Z talent for business transformation

Gen-Z is known for its value orientation and strong commitment to sustainability. This panel explores how companies can attract and retain the best talent from this generation through strong sustainability strategies and departments. Experts from human resources, sustainability management and young Gen-Z professionals share their perspectives and strategies. What expectations does Gen-Z have of their employers, and how can companies meet them to secure the future generation of leaders?

DISCUSSION

10:30 The CPO as a shaper of the future

Chief Procurement Officer – the role is currently changing faster than ever. New means, such as digital transformation, but also new challenges, such as global delivery bottlenecks or CO2 neutrality, require additional skills and an expanded repertoire. What is the best positioning of the CPOs of the future? What characteristics and leadership skills are particularly required for this role?

DISCUSSION

13:30 Sustainable procurement: Into the future together with a smile

The demands on procurement managers have increased massively in recent years, but so have the opportunities. Purchasing has never been in a better position to prove its value to a company than it is today. Mastering the challenges requires teamwork, both with internal and external stakeholders. Only with collaborative approaches can the right course be set together and economic, social and ecological improvements realised in the supply chains.

PANEL
DISCUSSION

15:45 Head to head: direct and indirect procurement competing for efficiency and value

In our panel "Head to Head": Direct and Indirect Procurement Competing for Efficiency and Value', we will discuss in detail how direct and indirect procurement face each other and compete for efficiency and value. We will highlight the different strategies, challenges and potentials of these two types of procurement and offer insights into their impact on organisations.
